

## Hardware Design Engineer (m/f) Dusseldorf-Germany

### YOUR TASKS:

You are:

- A Hardware Design Engineer in the field of technical coordination and development of new innovative solutions

That includes:

- Analysis of requirements and development of solutions
- Driving technical innovations, continuous development of know-how
- Construction of prototype circuits
- Layout check & optimization (among others according to Electromagnetic compatibility (EMC) guidelines)
- Coordination of projects in the field of hardware development

### YOUR QUALIFICATION:

- Successfully completed studies of electrical engineering or comparable qualification
- Knowledge of electronics development (EAGLE), circuit technology
- Experience in assembly, marking, testing and repair of electronic modules and devices
- Accompaniment of requirements workshops and commissioning at the customer
- Fluent in English
- German language preferable but not a must
- Class B driving licence

### THIS IS WHAT WE OFFER YOU:

- Employment contract for an indefinite duration
- Long-term perspective for your professional career in a future-oriented company
- High level of autonomy and decision-making freedom with very flat hierarchies
- The opportunity to actively shape the development of our company and thus also your career
- Continuous training and interesting career opportunities

Please send us your complete application documents (cover letter, curriculum vitae, certificates), stating your salary expectations, and your earliest possible starting date, to [b.hoti@puricity.com](mailto:b.hoti@puricity.com)
